# Introduction

***Heaven on Earth*** is the latest photo publication from the landscape photographer, Pele Leung. This large format e-book includes over 170 photos Pele took in Australia in the last decade. It contains 16 chapters in a staggering volume of 320 pages and each chapter has its own theme and description. Its themes are extensive and cover the essence of many landscape subjects. In order to enhance the visual experience, many photos are illustrated on double-page spread and the idea is to make the scenes look as real as possible.

Australia is a large country and contains a lot of attractive scenery. In this e-book, Pele shows you the best parts of the country including both well-known landmarks and hidden treasures. We trust that you will be impressed. As a bonus, Pele also shares his photographic hints in the appendix and hopes that you would be both benefited and entertained simultaneously.

In order to share Pele's work with more people, this e-book is reasonably priced and we believe it is one of the most valuable photographic collections in its own class. Pele is proud of this e-book production and trusts that it will not disappoint any readers who are interested in landscape photography and nature. Finally, we thank you for your support in advance.

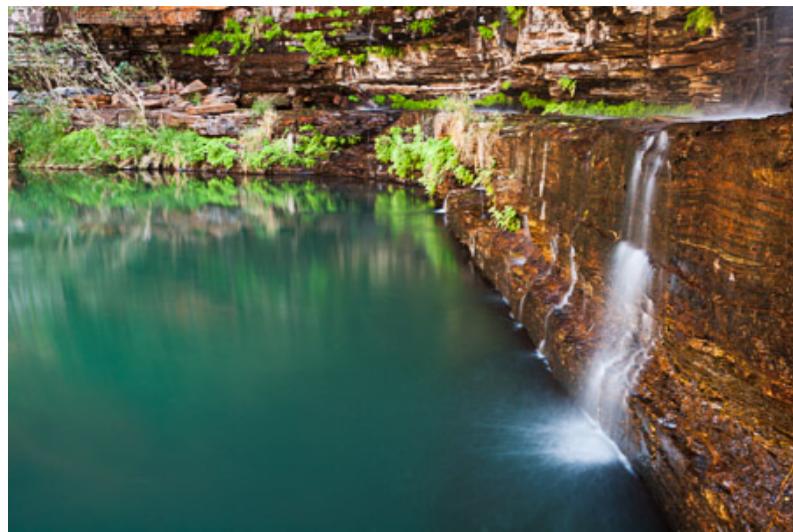

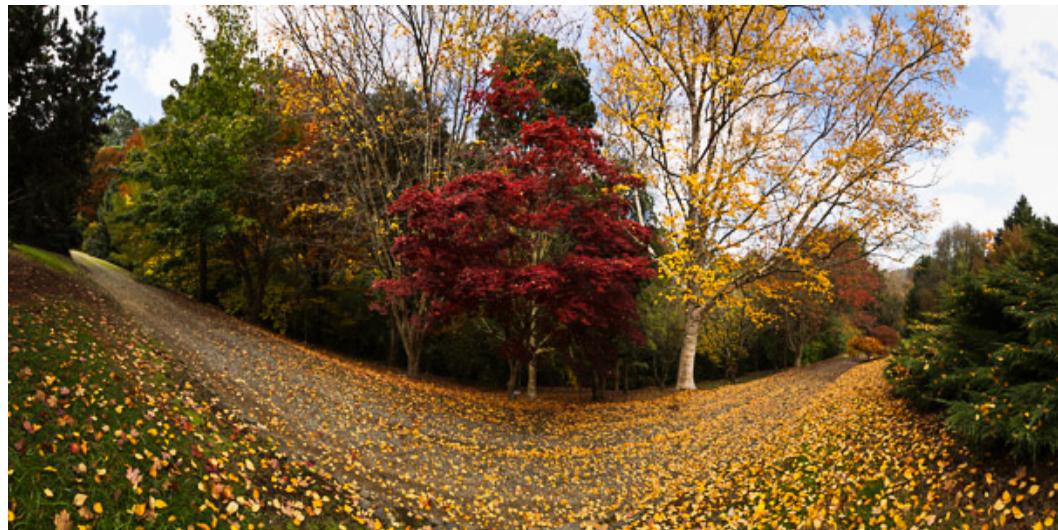

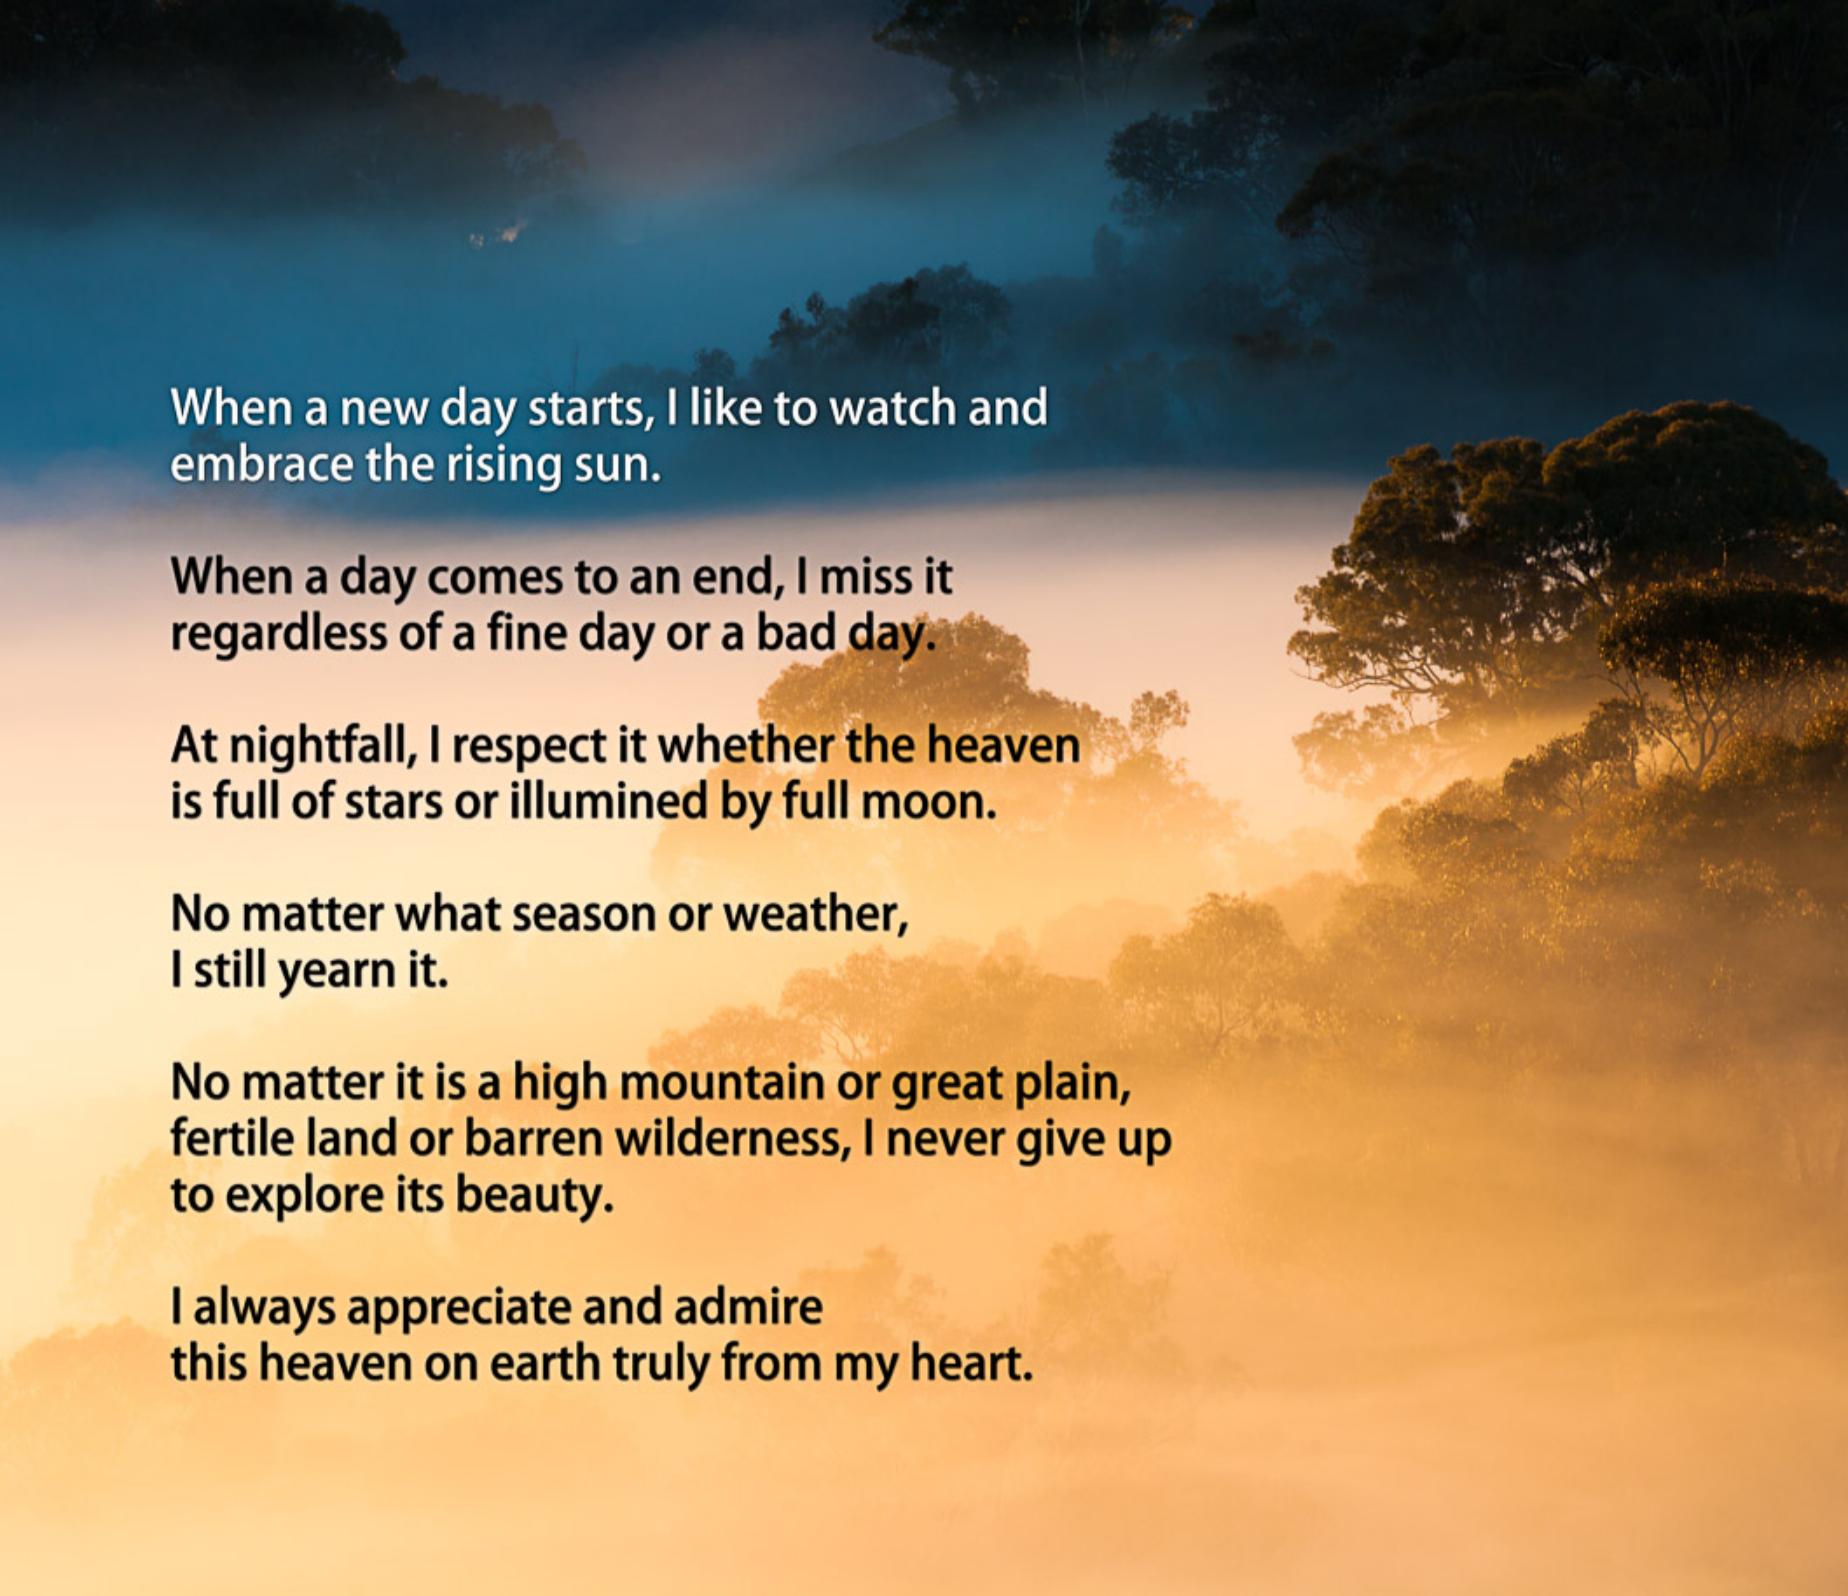

Photo by Anab Leung

When a new day starts, I like to watch and embrace the rising sun.

When a day comes to an end, I miss it regardless of a fine day or a bad day.

At nightfall, I respect it whether the heaven is full of stars or illumined by full moon.

No matter what season or weather, I still yearn it.

No matter it is a high mountain or great plain, fertile land or barren wilderness, I never give up to explore its beauty.

I always appreciate and admire this heaven on earth truly from my heart.
